DEPARTMENT OF NATURAL RESOURCES

2020 National Emissions Inventory Hierarchy

Current Air Emissions Reporting Requirements Rule Point Sources

40 CFR Part 51 Subpart A Air Emissions Reporting Requirements rule (AERR) requires that states report SO_2 , VOC, NO_X , CO, Lead and Lead Compound, Primary $PM_{2.5}$, Primary PM_{10} , and NH_3 emissions from point sources (Intermediate and Part 70 Operating Permits).

- Hazardous Air Pollutant (HAP) reporting is optional.
- Sources in Missouri without an operating permit are not reported as point sources but are included in the nonpoint inventory.

Proposed Air Emissions Reporting Requirements Rule General Information

- Proposed amendment to the AERR rule 40 CFR Part 51 Subpart A published on August 9, 2023.
- Comment period ends November 17, 2023.
- Preamble, proposed rule language and preamble, comment information, and additional resources:

https://www.epa.gov/air-emissions-inventories/air-emissions-reportingrequirements-aerr

- The proposal:
 - May require changes to the Air Pollution Control Program's emissions reporting rule:
 - Increased reporting frequency for non-major sources.
 - Changes to reporting thresholds.
 - Earlier reporting dates.
 - May further restrict information that can be held confidential.
 - Requires coordinates for each individual emission point reported.
 - Requires increased reporting of performance tests and evaluations to EPA.
 - Requires emission estimates of mobile sources at an installation.
